

## NOTE 2002-2003 WRX OWNERS

Subaru does some weird things from time to time. For the 2002-2003 model year Subaru chose to use whatever rear caliper that was available at the time of assembly. In other words some late 2002 WRX's are sporting 2003 rear calipers, and some early 2003 WRX's are sporting 2002 rear calipers.

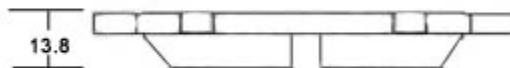

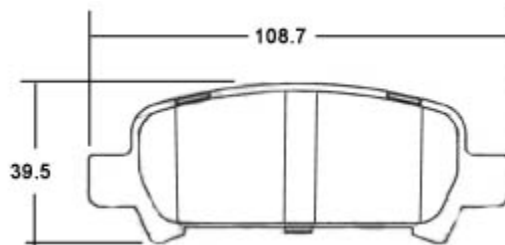

In order to determine the difference the pad must be removed.

You as the customer are responsible for ensuring that the rear brake pad is the correct one before ordering. There will be no refunds on the rear brake pads.

The size and style of pad is references below.

**770 PAD**

**1004 PAD**
